EDUCATION

Full Stack Certificate at
Suncoast Developers Guild -
2019

M.S. in Medical Science at
College of Medicine USF - 2014

B.A. in History USF - 2013

B.A. in English USF - 2005

SKILLS

HTML

CSS

Javascript

React

C#

.Net

SQL

Project Management

RELEVANT EXPERIENCE

Suncoast Developers Guild, St. Petersburg, FL 2019

SDG is an immersive and intensive coding program focusing on full-stack web developers. The curriculum focuses on both front-end (including React Hooks) and back-end fundamentals, resulting in graduates who develop interactive client-side applications backed by databases and server-side technologies.

PROJECTS

Minesweeper : An old-school game with a personal interface

- I built a React app built on a RESTful API, mapped over a two-dimensional API response, and set up a POST to update the game board from the user's input. The design was inspired by taking my dog to the dogs to the park.

Color Picker : A fun toy that dynamically updates a webpage

- A dynamic website built using React Hooks, my color picker has four sliders that change the HSLA values of the background of the page. This project started only using HSL and I added an A value and slider when I solidified the basic goals of the project.

Crypto-Ticker : A way to track invented currencies

- I used an API to find, display, and update current data about a variety of cryptocurrencies. I used a React app and updated the currency values every 10 seconds. I mapped over returned API data and used flexbox for display.

Let's go to the Movies : An entertaining group project

- We built a group project, using APIs and React-Router-Dom to make a webpage to display currently playing movies, a dynamically created page for each chosen movie, and the cast for those movies.

Books at Park Place, St. Petersburg, FL - Manager 2010-2019

As a manager at the bookstore my tasks focused on customer service and experience, and also included wholesale quotes, orders, and deliveries, inventory control, special orders, training new employees, public relations and outreach, and technical support of internal POS system.

VOLUNTEER WORK

Pinellas County Volunteer - I gave tours of historical homes, answered questions, demonstrated fiber arts techniques, and promoted local community involvement.

INTERESTS, HOBBIES, AND ACTIVITIES

I like reading, road trips, dog beaches, knitting, home repair, baking, and kayaking.
