

Projects

Color Picker - <https://github.com/Dantezinferno0/colors-again>

This application uses React Hooks to track variables attached to slider bars. The values tracked are displayed beside each slider bar and also change the inline styling CSS of the "random color" button to change the color and opacity. The picture in the background serves to create a backdrop to perceive the effect of the opacity change.

Black Jack - <https://github.com/Dantezinferno0/card-game>

This is a Vanilla JavaScript card game called that follows most of the game logic of a full featured Black Jack application. The purpose here was to hone JavaScript skills to render images based on user inputs, calculate scores, and use CSS to enhance the winning and losing messages that follow at the end of each game hand.

Movies - <https://github.com/AllanHall/movies>

This was a group project to create a "Now Showing" movie page. It uses some interesting CSS scrolling features and React to create a responsive movie listing page with pleasing and simplistic viewing interface. It also integrates React Router page switching. Merging, branching and cloning in collaboration with two other people was a great way to practice online collaboration from a remote work location.

Skills

Proficient in JavaScript, React, HTML5, CSS, C#, Postgres/SQL on Ubuntu, Mac, or Windows. Musician and music producer. Expert Surfer/Surf Instructor, Mountain climbing guide and Knot tying genie.

Experience

SUNCOAST DEVELOPERS GUILD – APRIL, 2019 -PRESENT

Lifelong interest and aptitude in computer technology lead to the Suncoast Developers Guild. Studied HTML, CSS, Javascript, React on the front end and ended with Dotnet and Postgres database development on the back end.

STUNT MAN – JANUARY 2016-MARCH, 2019

Trained LIMS academy and learned the movie business and incorporated talents into the framework of stunts. Achieved the position of head rigger, responsible for the safety of the performers, equipment, and performing. Worked for Action Horizons as a puppeteer/stunt performer at universal studios as a Raptor Dinosaur.

SERVER/ SALES ASSOCIATE – 2004-2016

Worked for several restaurants serving tables. Improved point of sale software for TacoLu by configuring the presentation of the menu items so that the servers could find what they needed fast and efficiently and increased revenue. I developed a sales technique for selling tequila that turned into a training focus for the company and increased their revenue. Last position held was the trainer for new employees because of in depth knowledge of the nuances of the point of sale system.

U.S. ARMY VETERAN JULY, 1998 - JULY 2002

Education: University of Phoenix, Online - Bachelor of Science in Psychology, 2011
