EXPERIENCE

PROforma, Tampa, Florida — *Developer Intern*

April 2019 - PRESENT

Worked with a team of developers to solve complex problems.

Wrote batch processes that get run often to manipulate and update the database.

Had to learn C#, Linq, SQL, and AngularJs on the job.

EDUCATION

Suncoast Developers Guild, St. Petersburg — *Certificate*

July 2019 - October 2019

A three month faced paced Full Stack Development course teaching C#, JavaScript, SQL, Linq, and many more.

PROJECTS

Slack Remake - NgRx and Angular8

Remade core features of Slack. A user can send messages to other users in a channel. A user can also send direct messages as well as messages to the current user. Has the option to create channels or delete channels that the user has created. Created a database in Firebase and used Firebase's authentication to allow a user to login with google, facebook, or just create a login with an email and password.

Employee Redux Management— *Redux and JavaScript*

Utilizes API calls to Create, Read, Update, and Delete employees in local storage. Used Redux to handle global state management. Routing was used to manage different pages.

BlackJack - Vanilla JavaScript

Recreated the game of BlackJack in vanilla JavaScript.

StackOverflow Remake - JavaScript, C#

Recreated the core features of StackOverflow. Created a Postgres database to manage questions and answers. You can Create, Read, Update, and Delete questions as well as answers.

TECHNOLOGIES

- C#
- JavaScript
- Linq
- NgRx
- Redux
- SignalR
- ReactJs
- AngularJs
- Angular8
- Git
- SQL
- Postgres
- Firebase

SKILLS

- Quick learner
- Self-directed
- Hard working
- Focused
