PROFESSIONAL SUMMARY

I am a passionate individual with a meticulous approach to problem-solving. Since building my first computer at age 13, I have developed an appreciation for creative processes. I feel that many businesses today do not understand or utilize advancements in technologies. I am motivated and intend to use my creative skills to help businesses bridge that disconnect.

TECHNOLOGIES

React Js · JavaScript · CSS · HTML5 · PostgreSQL · .NET Core · ASP.NET Core · C # · Entity Framework · SQL · RESTful API · Git · Node Js · Adobe Photoshop

SKILLS

Troubleshooting · Strategic Planning · Blockchain Development · Smart Contracts · Project Management · Personnel Management · Community Engagement

PROJECTS

Stack Overflow Functionality Clone
https://github.com/swander926/suncoastoverflow

- Developed front-end with React Js and back-end with C# and PostgreSQL
- Implemented GET, POST, PUT, and DELETE requests with RESTful API
- Integrated cloud-based API to allow users to add new questions and rank page content through voting

Blockchain Solutions in Algorand
https://github.com/swander926/algorandtest

- Generated multiple private keys using 16-word unique mnemonic passphrases to gain access and swap digital assets.
- Implemented SDKs to create a new asset on the Algorand blockchain by converting codebase into unique transactional approval language (TEAL)

Swander's Automotive Company Website
https://github.com/swander926/samonline

- Created highly professional site using React Js for established business
- Connected front-end with multiple APIs to allow users to schedule an appointment, submit a resume, and claim rewards
- Integrated Google Business API to display reviews and aid navigation

Minesweeper Puzzle
https://github.com/swander926/minesweeper

- Effectively utilized React logic to implement game rules
- Communicated with RESTful API using GET requests to create gameboard
- Created a visually pleasing UI paying attention to minor details
