PROJECTS

Minesweeper — *JavaScript, React.js, Minesweeper API*
Using a Minesweeper API, employed React components and modified state to update the DOM in response to user events. Users can choose difficulty and reset the game.

HSL Color Picker — *JavaScript and React.js*
Used state and props to drive changes in the user interface dynamically. Changes colors with user events, displays an HSL color code and generates a random color.

Blackjack — *JavaScript, HTML and CSS*
Created an event-driven user interface using loops, objects and conditional logic with pure JavaScript. Styled with CSS.
