Who I Am

My name is Rick Anthony Ortiz. I'm a full stack developer with a love for technology and building applications for commercial and personal use. I love to learn new things and improve my skills in finding efficient solutions to complex problems. I'm always striving to get better at what I do and have always felt that the best way to do that is by doing.

Skills

- HTML
- CSS
- SASS

- Javascript
- React
- C#

- ASP.NET
- PostgreSQL
- Git

What I've Done

Weather Checker - pulled information from a publicly available Api that allows the user to input a location and displays the weather in their area using Javascript.

Movie Database - pulled information from the TMDB (The Movie Database) API that shows a list of popular movies and shows the descriptions of the movies for each one.

Scoreboard - A simple application that allows two users to input team names and changes the background color based on the winner.

HSL changer - used React hooks in order to create an app that allows the user to change the Hue, Saturation, and Lightness of the background.

Patient Account Representative / Network Service Associate
Carecentrix, Inc | Tampa, FL
August 2017 – July 2019

- Assisting patients and healthcare providers with a multitude of billing and payment related concerns including cost estimation, payment arrangements and invoicing discrepancies.

Billing Specialist
Riverchase Dermatology | Fort Myers, FL
December 2015 - August 2016

- Responsible for verification of overpayments from Insurance carriers including Cigna, United Healthcare and Aetna as well as Government insurance including Medicare and Tricare.

Reimbursement Specialist
NeoGenomics Laboratories | Fort Myers, FL
October 2011- February 2014

- Coordinated reimbursement from large insurance carriers specifically for specialty diagnostic laboratory charges.
- Collaborated with senior members of staff and co-workers in order to find solutions to ICD-9 and CPT billing errors, as well as, ensuring compliance to CMS and Medicare guidelines.
